

Recall IQ

Recall IQ is a browser extension designed to help you effortlessly track and organize your coding journey. It automatically captures your solved problems, saves code snippets, and syncs your progress directly to your repository so you can recall, review, and master your DSA problems.

Download Extension

You can download the latest version of the Recall IQ extension directly from Google Drive.

Steps:

1. Open the Google Drive download link.
 2. Click Download.
 3. Save the ZIP file.
 4. Extract the ZIP file to a folder on the computer.
-

Install and Activate in Chrome

Provide detailed steps:

1. Open Google Chrome.
 2. Type <chrome://extensions/> in the address bar.
 3. Enable **Developer Mode** from the top-right corner.
 4. Click **Load unpacked**.
 5. Select the extracted Recall IQ folder containing *manifest.json*.
 6. Wait for Chrome to load the extension.
 7. Verify that the extension appears in the Extensions list.
 8. Click the puzzle-piece icon in Chrome.
 9. Pin Recall IQ for quick access.
-

Usage

Briefly explain:

- Click the Recall IQ icon.
- Sign in if required.
- Save code snippets from supported websites.

- Access saved snippets anytime through the extension.
-

Troubleshooting

Include common issues:

- **"Manifest file is missing."**

Ensure that when clicking 'Load unpacked', you select the folder that directly contains the manifest.json file, not a parent directory or the original ZIP file.

- **"Extension failed to load."**

Check if any files were corrupted during extraction. Try deleting the folder, re-extracting the ZIP file, and loading it again.

- **"Developer Mode not enabled."**

If you do not see the 'Load unpacked' button, make sure the Developer mode toggle in the top-right corner of `chrome://extensions/` is turned On.

- **"Chrome blocked the extension."**

This can happen if the extension files are modified after loading. Simply go to `chrome://extensions/` and click the Reload button on the Recall IQ extension card.
